

MONARCH

THE RING BOX  
REINVENTED

## Details every guy forgets on proposal day

# 1

The Monarch ring box embodies the small details that most guys forget when proposing. No more worrying about how you will conceal a large ring box. Place your ring in the Monarch Box, tuck it in any pocket, and be confident it will reveal your engagement ring in the most beautiful way.

## Conceal & Reveal

# 2

Weighing in at just 60 grams, and only 12mm thick, Monarch Box will slip into any pocket.

The powerful hidden magnet below the fabric surface ensures that a perfect seal is maintained and your engagement ring is kept safe. Crafted in aluminum, electropolished, anodized, and lined with Bridal Satin, Monarch has achieved the perfect combination of elegant design and individual style.

### 3 Say anything with laser engraving

Make your proposal unforgettable by adding a personal laser-engraved message. We purposefully left room on the inside of the Monarch Box for laser engraving. This adds another incredibly special element to the proposal and the continued use of the box after the wedding.

### 4 Custom colors for any style or brand

All Monarch ring boxes are lined with Bridal Satin. This incredible fabric provides endless color options. Choose from one of our selected colors or pick a completely custom color that will match your brand or customer's needs.

# 5 Let Monarch boost your brand

It is surprising to think about how we present something as beautiful as an engagement ring. You have to ask yourself how large, bulky, poorly made, cheap, one time use boxes became the standard for an occasion so precious and life altering. Let the Monarch engagement ring box build your brand and showcase your rings like never before.

The Monarch Box retails for \$159  
with special rates available for wholesalers.
